

Processor Settings
CM208W Subwoofer Series

Crossover

| | Frequency | Slope |
|------------------------------------|-----------|------------------------|
| CM208W, CM208W-TB, CM208W-SR - HPF | 30Hz | 24dB Oct. Butterworth |
| CM208W, CM208W-TB, CM208W-SR - LPF | 100Hz | 24dB Oct. Butterworth* |

*(Biamp or stand-alone mode only, not to used when high passed outputs are in use)

Limiting

RMS Voltage

See Application Note
"Setting System Limiters"

All versions 40 Volts*, 45 msec attack, 720 msec release, 100:1 ratio (recommended predictive peak stop @ 80 Volts or amp clipping)

*(RMS Limiting remains the same with the high passed outputs in use)
