

## LS6593v2 and CDA300 Pole Mount Bracket

This pole mount bracket will mount two LS6593v2 or one CDA300 on a standard speaker stand using the back rigging points of the speaker.

**This mount will only provide proper support for (2) LS6593v2 units.** Attach bracket as shown below when using with LS6593v2 loudspeakers. A good starting point for loudspeaker column placement (for a vertically flat seating area) is putting the top of the column at 9.25ft with a 2 degree down angle relative to the seating plane.

**SUPERIOR LISTENING SYSTEMS**  
AUDIO CLARITY REDEFINED

## Using the Pole Mount Bracket with the CDA300

The pole mount bracket should be attached as shown below. This bracket is also required if the CDA300 is to be used with it's companion subwoofer, the SP15.
